

SKILLS: JavaScript | Python | React | Redux | PostgreSQL | Express | Flask | SQLAlchemy | HTML | CSS

PROJECTS:

QueWhat *Python, ReactJS*

[live](#) | [github](#)

A Quora clone that used Python and Flask backend with React frontend.

- Planned API routes and frontend routes as well as designed and organized database schema in preparation for starting this project
- Used wtForms for form validation and set errors if validation errors found in backend routes to prevent incorrect data from being submitted and increase security in login process
- Implemented animations and color changes in buttons and links to make site more visually appealing to user

One To Ten *Python, ReactJS*

[live](#) | [github](#)

A site loosely based on OkCupid in which users take surveys with answers from one to ten.

- Coordinated with the team to design and structure the site to be intuitive to the user
- Built the Redux store and implemented to keep state throughout the application
- Developed and created form components to allow user profile changes

PokeMeetup *JavaScript, Express, ReactJS*

[live](#) | [github](#)

A Meetup clone with a Pokemon theme.

- Implemented dayjs, a JavaScript library, that allowed to parse and manipulate dates for creating and editing events more easily
- Integrated modal forms into site to make site more interactive for user
- Created form that allowed users to submit picture urls so that users could include pictures in their event description

Recipepeople *JavaScript, Express, Pug*

[live](#) | [github](#)

A site based on GoodReads with recipes instead of books.

- Collaborated with a team to structure the database and design the wireframes.
- Developed backend API routes for "Collections" of recipes as well as designed front end Pug templates so that user could easily add recipes to their "Collections"
- Styled portions of the site such as dropdown menus to fit with the design of the site.

EXPERIENCE:

Floater Pharmacist | CVS

Dec 2020 - Sept 2021

- Transported and administered COVID19 vaccinations to healthcare staff and residents of long term care facilities in eastern side of North Carolina.
- Floated to CVS inside Target stores in the surrounding area as a float pharmacist. Responsibilities included overseeing technicians, filling and dispensing medications, solving billing issues, maintaining inventory, consulting patients on medications, and assessing prescriptions for proper dosage and drug interactions.

Floater Pharmacist | Walgreens

May 2020 - July 2020

- Floated to Walgreens pharmacies in the surrounding area. Assessed prescriptions for proper dosage and drug interactions, consulted healthcare practitioners for patient treatment plans, dispensed medications and vaccinations.

EDUCATION:

University of the Pacific Thomas J. Long School of Pharmacy - *PharmD, BAS, 2016-2019*

AppAcademy - *Sept 2021 - Mar 2022* - Completed 6 month course to learn several coding languages while passing competency exams and creating both group and solo full stack projects
